NATIONAL TRANSLATIONS CENTER

The National Translations Center is a depository and information source for unpublished translations into English from the world literature of the natural, physical, medical and social sciences. NTC files contain information on approximately 1,000,000 translations, 400,000 of which comprise the NTC translation collection. In view of important work reported in other languages, the Center is a valuable research tool for the English-speaking scientific community. A cooperative nonprofit enterprise, its services help: (a) to eliminate costly duplication of translation effort, thus freeing funds for translating new material; (b) to disseminate information on available translations; and (c) to provide copies of translations on file or refer inquiries to other known sources.

Scientific and professional societies, governmental agencies, industrial and other special libraries, colleges, universities and other institutions in the United States and abroad deposit in the Center the translations prepared by them. Deposit of translations from any source is welcome. The indentity of each depositor is obliterated from the translations so that donor anonymity is assured. The Center also solicits information on translations available from commercial translators and other collections in the United States and elsewhere. Index files are maintained by author, journal citation, report number, standard number and patent number. Inquiries are promptly answered on the availability of translations from the Center or any other source.

The National Translations Center was formally organized in 1953. After a seventeen year association with the Special Libraries Association, the Center became a department of the The John Crerar Library in 1971. Holdings of NTC, as well as translations available from other sources, are listed in *Consolidated Index of Translations into English*, 1969, (1953-1966) and *Translations Register-Index*, 1967-.

Under the terms of the NTC subscription/service program, information from the Center's data files regarding the availability of translations can be obtained in several ways. Those who both produce and acquire large numbers of translations can join the Center in a program which is mutually beneficial. The deposit of copies of translations to the Center will entitle the donors to receive information about the availability of other translations which they may need at no charge. Calendar year 1975, served as the basis for instituting this new procedure in 1976. New depositors automatically and immediately become eligible for whatever category (number of translations deposited) they qualify for.

The categories are: (1) 1-20 translations deposited. Free access equalling the number of translations deposited, with additional searches provided at a fee of $5.00 per item. (2) 20-40 translations deposited. Forty free availability searches provided, and beyond 40, at $5.00 per item. (3) Over 40 translations deposited. Unlimited access to the Center's files at no charge. (4) Non-depositing subscribers can obtain searches as needed at a fee of $5.00 per item. (5) Non-subscribers can obtain information searches at a fee of $5.00 per item.

TRANSLATIONS REGISTER-INDEX

Translations Register-Index is published by the National Translations Center. The publication is computer produced. The register section announces new accessions to the NTC data base. The index sections include an author, journal citation, patent and standard index. In the register section, translations are listed in subject categories. NTIS ONLINE subject classifications are used. Each item, as it is entered into the system is assigned an entry number, which is used as the reference source in the author index. It should be noted that the entry number is not an order number for any translation. Full order information is contained within each entry. The journal citation, patent and standard indexes are self-contained. Each index cites the order number and source for any item referenced. In the individual journal citation indexes the NTIS ONLINE subject category is given as a key to the main entry in the register section of that issue. Sources of availability are found in the Directory of Sources published with each issue. The index sections of TR-I cumulate semi-annually and annually for all entries to date in the volume.

ORDERS AND INQUIRIES

Orders for copies of known translations and inquiries as to the possible availability of others should be addressed to the National Translations Center, The John Crerar Library of the University of Chicago, 5730 South Ellis Avenue, Chicago, IL 60637. Send all correspondence concerning subscriptions, renewals, and the availability of back issues and volumes to the same address. The NTC telephone number is 312-962-7060.
